

**NOYO RIVER AND HARBOR  
OPERATIONS AND MAINTENANCE**

PROJECT LOCATION AND DESCRIPTION: This project is a shallow-draft harbor of refuge, supporting a Coast Guard search and rescue station, commercial and sport fishing, and recreational boating. It is located at Fort Bragg, California, about 140 miles north of San Francisco. The operations and maintenance schedule provides for annual inspection and periodic repair of entrance jetties, and for 2-year cycle maintenance dredging of the Entrance and River Channels to -10 feet Mean Lower Low Water (MLLW).

TOTAL FUNDING:

TOTAL COST:	\$ N/A
FEDERAL COST:	\$ N/A
NON-FEDERAL COST:	\$ N/A

TOTAL FEDERAL COST FY05:	\$ 0
FISCAL YEAR 2006 BUDGET:	\$ 28,000
COST TO COMPLETE:	\$ N/A

FY 05 AND 06 ACCOMPLISHMENTS: Funding permitting, periodic inspection will be conducted to monitor structure condition. Dredging of the project is due, provided a disposal site and funding is available. Phase I of the Dredged Material Management Plan (DMMP) will be completed in FY05.

ISSUES AND OTHER INFORMATION: The local sponsor, Noyo Harbor District, is presently responsible for furnishing a suitable upland disposal site for the project. Currently, the upland disposal site is full and incapable of receiving dredged material. The sponsor is interested in the possibility of participating in a new upland disposal site cost-sharing program provided for in the 1996 Water Resources Development Act (WRDA). A preliminary DMMP study concluded that a new upland disposal site is economically feasible. Additional funds are required to initiate and complete a decision document justifying approval for a new site to be constructed.

CONGRESSIONAL INTEREST: 1<sup>st</sup> District, Rep. Mike Thompson

POINTS OF CONTACT: LTC Philip T. Feir (415) 977-8500 and Deputy District Engineer for Civil Works, Arijs Rakstins (415) 977-8702
